

# HOMMAK

## micromix

new

HOMMAKMICROMIX is a high-speed, high-shear mixing machine with a multi-stage homogenization structure. It is designed to enhance the structure of powder and liquid products through excellent homogenization. HOMMAKMICROMIX mixes products quickly and air-free, improving quality, reducing production time, and operating with low energy consumption.

### Key Features:

- **High Efficiency:** Provides homogeneous, air-free mixing, especially for liquid products.
- **High Speed, High Shear:** Quickly and effectively mixes both solid and liquid materials.
- **Energy Saving:** Uses less energy compared to traditional units, reducing costs.
- **Wide Applications:** Suitable for various industries like food, pharmaceuticals, and cosmetics.
- **Easy Maintenance:** Durable design with easy cleaning and minimal maintenance requirements.

INNOVATIVE  
MANUFACTURING  
Brand

**Enhance product quality, save time,  
and cut costs with the efficient,  
air-free mixing power of HOMMAKMICROMIX.**

### APPLICATION

#### Dairy

#### Food & Beverage

#### Chemicals & Petrochemical

#### Cosmetics

#### Pharmaceuticals

#### Biotechnology

**HOMMAK®**
